

Core-emt A/S and SMT solutions ApS, both suppliers of equipment for the electronics production in the Northern market, have come to an agreement to merge their activities as of today. Thereby Core-emt A/S is strengthened with the sales of SMT Solutions ApS, while the synergy of Core-emt A/S's strong service-organization is maintained.

“For a long time we’ve wanted to strengthen our sales, and with Søren onboard in Core-emt A/S, we expect to speed up the process. Søren’s performance in SMT Solutions ApS the last ten years, and the experience gained, will strengthen Core-emt A/S’s sales significantly. Core-emt A/S is delighted to welcome Søren as a central figure of the organization” – Steen Haugbølle, CEO, Core-emt A/S.

CEO of SMT Solutions ApS, Søren Tranberg, enters as part-owner alongside current owner and CEO of Core-emt A/S, Steen Haugbølle. Following the merger, Core-emt A/S will continuously carry Yamaha SMD machines as previously done. I-PULSE SMD machines will be added to the product range, which expands opportunities to cover a broader market and the needs of customers. I-PULSE is made by Yamaha, and has been sold by SMT Solutions ApS the last ten years.

“With the opportunities presented from SMT Solutions ApS, Core-emt A/S offers a wide product portfolio, and with more news coming, we now cover a wider segment of the market. I’m also pleased to offer the customers from SMT Solutions ApS, new opportunities and options, and last but not least, access to Core-emt A/S’s strong service-organization.” – Søren Tranberg, Sales Director, Core-emt A/S

After the merger, the company now employs nine people including the owners. It is to be expected that the merger will demand further resources to cover and expand the position throughout the Northern Countries. Both companies possess an AAA rating, and recently published good financial statements for the years 2015-16. Furthermore, Core-emt A/S was awarded with Børsen Gazelle in 2016.
