Company

Nutek Europe BV is the European distributor of Nutek Board Handling & Traceability Equipment and is the leading supplier of this equipment for the European, African and Middle East PCB Assembly industry.

Our history traces back to 1992, when Nutek Europe obtained the exclusive European sales rights of Nutek Pte Ltd, Singapore. Since then a network of agents has been setup and maintained to serve customers throughout our sales region. The agents are supported by the Nutek Europe’s area sales managers who are familiar with the entire production process and specialize in several specific areas.

Nutek Europe has its own customer-service department with a standard 12-hours response time. Naturally, Nutek Europe has the necessary spare parts on stock for fast delivery, if required.

The Nutek Europe facility offers adequate space for customer demonstration’s, technical- and sales training and has a 750 square meter warehouse, where the European stock of Nutek equipment, including spare parts and magazine racks is stored.

The unit is designed to accurately mark PCB’s within a production line or can be used as a stand alone cell. A “flying laser” concept is used which means that the PCB is locked in the marking position while the CO2 laser is moved using servo controlled X-Y axis. The number of markings and their positions are easily programmed in Windows™ based software. An optional integrated inverter is available for double-sided marking.

**Standard features**

- CCD camera for readability check.
- Three level camera lighting (brightness)
- Large marking area.
- Controlled by industrial PC.
- Capability to mark text, barcodes, 2D codes and graphics.
- Conveyor width adjustment using hand crank.
- Rigid machine structure with large access doors.
- PCB side clamping.
- Mechanical PCB lift for constant focal point.
- Quick product change-over.
- Selectable by-pass operation.
- Uninterruptible power supply (UPS).
- Towerlight display for machine status.
- CE certified.
**Technical specifications**

Laser type: CO₂, 10 Watt, air cooled
Wave length: 10.63 µm
Laser class: Class 4
Housing class: Class 1
Marking area: 105 mm x 105 mm per position, 460 mm x 460 mm total coverage
Cell size: ≥ 0.127 mm (5 mil)
Conveyor type: 3 mm ESD edge belt
Conveyor speed: 24 m/min.
PCB transfer time: ≤ 5 sec.
System software: Windows XP
Network interface: Ethernet
Monitor: 17” high-density flat screen
PCB transfer height: 950 mm ± 25 mm*
Component clearance: Top 30 mm, bottom 30 mm*
Conveyor flow direction: Left to right*
Conveyor interface: SMEMA*
Colour: RAL 9002*
Power supply: 230 VAC/50 Hz/1 Ph
Power consumption: 1610 VA max.
(fume extraction included)
Air supply: 5 bar
Air consumption: 20 ltrs/min max.
Noise level: max. 65 dB
* or specify

**Options**

- Program controlled conveyor width adjustment
- PCB orientation check
- Fiducial recognition and position alignment
- Double-sided marking using integrated inverter
- Barcode scanner (Microscan MS4)
- Bad marking recognition
- Database- and network connection
- Fiber laser
- Fume extraction unit (external, 1000 VA max.)

Other options available on request

---

**LMC-S3**

| Machine dimensions (l x w x h) | 850 x 1645 x 1380 mm |
| Weight | 700 kg |
| Applicable PCB length | 80 mm - 508 mm |
| Applicable PCB width | 65 mm - 460 mm |
| PCB thickness | 0.6 mm - 4 mm |
| Fixed rail to front dimension (A) | 330 mm |
The unit is designed to accurately mark PCB’s within a production line or can be used as stand alone cell. The usage of a 3-axis galvo-head provides a large marking area (350 x 350 mm) without having to use a X-Y gantry. This results in very short cycle times for a large number of markings. The type, number of markings and their positions are easily programmed in Windows™ based software. An optional integrated inverter is available for double-sided marking.

**Standard features**

- Controlled by industrial PC.
- Capability to mark text, barcodes, 2D codes and graphics.
- Conveyor width adjustment using hand crank.
- PCB side clamping.
- Rigid machine structure with large access doors.
- Dynamic (adjustable) focal distance using software.
- Quick product change-over.
- Selectable by-pass operation.
- Uninterruptible power supply (UPS).
- Towerlight display for machine status.
- CE certified.
**Technical specifications**

- Laser type: CO2, 10 Watt, air cooled
- Wave length: 10.63 µm
- Laser class: Class 4
- Housing class: Class 1
- Marking area: 350 mm x 350 mm
- Cell size: ≥ 0.195 mm (7 mil)
- Conveyor type: 3 mm ESD edge belt
- Conveyor speed: 24 m/min.
- PCB transfer time: ≤ 5 sec.
- System software: Windows XP
- Network interface: Ethernet
- Monitor: 17” high-density flat screen
- PCB transfer height: 950 mm ± 25 mm*
- Component clearance: Top 30 mm, bottom 30 mm*
- Conveyor flow direction: Left to right*
- Conveyor interface: SMEMA*
- Colour: RAL 9002*
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 1600 VA max. (fume extraction included)
- Air supply: 5 bar
- Air consumption: 20 ltr/min max.
- Noise level: max. 65 dB

* or specify

**Options**

- Program controlled conveyor width adjustment
- Double sided marking using integrated inverter
- Code verification of one single code using fixed scanner (Microscan MS4)
- Code verification, covering full marking area, using CCD camera, camera adaptor and LED bar lights
- Database- and network connection
- Fiber laser
- Fume extraction (external, 1000 VA max.)

**LMC-S5**

- Machine dimensions (l x w x h): 745 x 1558 x 1752 mm
- Weight: 550 kg
- Applicable PCB length: 80 mm - 508 mm
- Applicable PCB width: 65 mm - 460 mm
- Applicable PCB thickness: 0.6 mm - 4 mm
- Fixed rail to front dimension (A): 236 mm
The unit is designed to accurately apply labels on PCB’s or on top of components. It uses a X-Y gantry to move the applicator head between the label printer and the placement position. The PCB is clamped in position and supported from the bottom by manual positioned magnetic support pins while one or more labels are applied at any desired position. The number of labels and their positions are easily programmed in Windows™ based software.

### Standard features
- Rigid machine structure with large access doors.
- Integrated 600 dpi printer.
- ZebraDesigner 2 user license.
- Slide-out mechanism (rear-side) for easy and fast label or ribbon replacement.
- Label rotation programmable in 1° step.
- Vacuum sensing of the label from pick-up to placement.
- CCD camera to read label before pick-up.
- Controlled by industrial PC.
- Conveyor width adjustment using hand crank.
- PCB side clamping.
- Active support base including 4 magnetic pins.
- Quick product change-over.
- Selectable by-pass operation.
- Uninterruptible power supply (UPS).
- Towerlight display for machine status.
- CE certified.
Technical specifications

Printer type: Zebra 110 x i4 (600 dpi)
Minimum label size: 5 mm x 5 mm
Label creation software: ZebraDesigner 2
Cycle time: 2.5 sec. per label
Conveyor type: 3 mm ESD edge belt
Cycle time: 2.5 sec. per label
Conveyor speed: 24 m/min
PCB transfer time: ≤ 5 sec.
System software: Windows XP
Network interface: Ethernet
Monitor: 17” high-density flat screen
PCB transfer height: 950 mm ± 25 mm*
Component clearance: Top 30 mm, bottom 30 mm*
Machine interface: SMEMA*
Colour: RAL 9002*
Power supply: 230 VAC/50 Hz/1 Ph
Power consumption: 700 VA max.
Air supply: 6 bar
Air consumption: 70 ltr/min max.
Noise level: Max. 65 dB

The Scan station integrates the ‘Adomo’ (Advanced Optical Modulation) system from the company MODI. This system enables the inspection of large areas with high resolution and short cycle times using stepper controlled mirror heads within the Adomo module. One of the applications is the scanning of 1D/2D codes at multiple positions.

The camera field of view can deflect from one position to another with an accuracy of 1 µm within just a few milliseconds. The process is controlled by an integral microprocessor that not only enables the precise movement of the mirror to each position, but also controls the camera synchronisation. Depending on the application, the system can be equipped with cameras with resolutions of 0.5-4 Megapixels.

**Standard features**
- ADOMO Camera System.
- Applicable scan area of max. 460 mm x 460 mm (depending on application).
- PC running complimentary VCSP software package.
- Extreme short inspection times.
- High-density flat screen.
- Sliding keyboard tray.
- Hinged front cover and rear access door.
- Integrated ESD edge belt conveyor.
- Electrical conveyor width adjustment.
- Selectable by-pass operation.
- Towerlight display for machine status.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to Right*

The unit provides automatic magazine change-over for continuous line unloading. PCB’s are collected from an upstream pusher conveyor (ordered separately) and pushed into the magazine. Full magazines are offloaded at an ergonomic low level.

**Standard features**
- Automatic magazine change-over.
- Automatic magazine alignment by upper and lower pneumatic clamping.
- Controlled by PLC.
- Tailor made to the magazine of your choice.
- Threshold signal to protect PCB’s in upstream oven.
- Towerlight display for machine status.
- Selectable pitch settings.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Components clearance: Top 30 mm, bottom 30 mm (depends on pitch)
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 550 VA max.
- Air supply: 4-6 bar
- Air consumption: 10 ltr/min max.
- PCB unloading time: ± 6 seconds
- Magazine change-over time: ± 30 seconds
- Pitch control: 1-4, 10mm pitch
- Maximum total magazine weight: 50 kg each
- Total number of magazines: 1 magazine on the lifter platform.
- 2 empty magazines on the upper magazine conveyor.
- 3 full magazines on the lower magazine conveyor.
- Pusher conveyor: To be ordered separately

**Options**
- Width adjustable magazine conveyor(s)
- Additional magazine capacity
- Shorter magazine change-over time (±22 sec)
- Touchscreen display
- Alarm buzzer
- Other options available on request

The pusher conveyor is used in combination with a multi magazine line unloader and guarantees that PCB’s are completely pushed into the magazine.

**Standard features**
- Controlled by multi magazine line unloader.
- Conveyor width adjustment using hand crank.
- Adjustable pusher position.
- Pneumatic stopper at inlet to control PCB flow from upstream oven.
- Regulated pressure on pneumatic pusher.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*

The unit is designed for automatic loading of unpopulated PCB’s onto the line using suction cups. The top PCB is lifted from stack and lowered onto belt segment.

**Standard features**
- Large stack capacity.
- Flexible suction cup positioning.
- By-pass mode selectable without removing PCB stack.
- Controlled by PLC.
- Convenient front door stack loading.
- Conveyor width adjustment using hand crank.
- Towerlight display for machine status.
- Empty stack sensor.
- CE certified.

- Power consumption: 150 VA max.
- Air supply: 4-6 bar
- Air consumption: 90 ltr/min max.
- PCB cycle time: ± 10 seconds
- Diameter suction pads: 15 mm
- PCB thickness capability: 0.2 mm - 4.0 mm
- PCB stock capacity: 220 mm

**Options**
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Cantilevered input- or output conveyor (length 500 mm)
- Touchscreen display
- Alternative suction cup size
- Alarm buzzer

Solder infeed conveyor

NTM 420M 1000 • NTM 420L 1000 • NTM 420XL 1200

This conveyor is used to feed PCB’s or pallets into wave soldering machine at 6-7° angle.

Standard features
- Conveyor width adjustment using hand crank.
- Two ESD belt segments of 500 mm (XL size = 600 mm).
- Second belt segment at 6-7° adjustable angle.
- Dual speed on second segment for fluent transfer.
- Controlled by PLC.
- CE certified.

Technical specifications
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Conveyor concept: ESD belt
- Belt speed: Fixed in at 14 m/min, variable out 0.5-14 m/min.
- PCB edge support: 3 mm
- Components clearance: Top 30 mm, bottom 30 mm
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 150 VA max.
* or specify

Options
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Pinchain (3 mm or 5 mm pins) instead of ESD belt
- Outfeed delay timer
Other options available on request

AOI Rework conveyor

The AOI rework conveyor is designed for good/bad PCB separation. The in- and outgoing segments pneumatically move up/down allowing separation without interrupting the flow of good PCB’s.

Standard features

- Rework and by-pass mode selectable.
- 7 ESD belt segments, providing possibility to buffer three failed PCB’s.
- Conveyor width adjustment using hand crank.
- Controlled by PLC.
- ESD bracelet connection.
- Foot rest.
- Overhead lighting.
- Flatscreen & keyboard support.
- PC stand.
- CE certified.

Technical specifications

- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to Right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Conveyor concept: ESD belt
- Belt speed: 14 m/min.
- PCB edge support: 3 mm
- Component clearance: Bottom 30 mm, top+bottom = 54 mm max. (belt to belt)
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 400 VA max.
- Air supply: 4-6 bar
- Air consumption: 65 ltr/min max.

Options

- Part shelf
- PCB release foot switch
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Variable speed per segment

The workstation is used where manual assembly work is performed on the PCB without removing it from the PCB assembly line.

**Standard features**
- Multi zone concept available, standard segment length is 500 mm.
- Work and by-pass mode selectable.
- Conveyor width adjustment using hand crank.
- Centre PCB stop position
- Enhanced stability.
- Controlled by PLC.
- ESD bracelet connection.
- Foot rest.
- Sliding parts shelf.
- LED overhead lighting.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Conveyor concept: ESD belt
- Belt speed: Fixed in 14 m/min, variable out 2-14 m/min.
- PCB edge support: 3 mm
- Components clearance: Top 30 mm, bottom 30 mm
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 150 VA max.

* or specify

**Options**
- Non standard conveyor/segment lengths
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Additional part shelf
- Bin rail
- PCB release foot switch
- Variable speed per segment
- Dual speed per segment
- Other options available on request

### Standard lengths (X):

Telescopic conveyor

The unit provides a ‘normal open’ passage in a PCB assembly line. An integrated conveyor segment slides across the opening to deliver PCB to downstream machine.

**Standard features**
- Conveyor width adjustment using hand crank.
- Electrically driven for smooth extension and retraction.
- Fully enclosed design.
- Controlled by PLC.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Conveyor concept: ESD belt
- Belt speed: 14 m/min.
- PCB edge support: 3 mm
- Components clearance: Top 30 mm, bottom 30 mm
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 300 VA max.
- Machine cycle time: ± 15 seconds
- Passageway: 847 mm

* or specify

**Options**
- Machine length 2000 mm, passageway of 1100 mm
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Normal closed operation using second belt segment (reduces passageway to 745 mm)
- Towerlight display for machine status
Other options available on request

The machine uses specially formulated elastomer rollers to remove dust, particles, etc. from the PCB surface. This contamination is transferred from the elastomer rollers to adhesive rolls.

**Standard Features**
- Touchscreen control panel used for easy programming.
- Preset number of PCB & pre-warning counter to purge adhesive rolls.
- Password protected.
- Single sided cleaning (topside or specify if otherwise).
- Ioniser bars (double sided) for static discharge.
- Integrated conveyor able to buffer one board cleaning.
- Easy changing of adhesive rolls.
- Conveyor width adjustment using hand crank.
- Controlled by PLC.
- CE certified.

The single magazine buffer can be used as a mid-line loader or unloader, as a LIFO/FIFO buffer or as a reject buffer.

**Standard features**
- 5 operation modes available:
  - Buffer mode (LIFO/FIFO)
  - Unload mode
  - Load mode
  - Reject mode
  - By-pass mode
- Dual function pusher conveyor.
- Pressure limitation on pneumatic pushers.
- Exchange magazine from rear of the machine
- Tailor made to the magazine of your choice.
- Threshold signal to protect PCB’s in upstream oven.
- Automatic magazine alignment by upper- and lower pneumatic clamping.
- Controlled by PLC.
- Towerlight display for machine status.
- Selectable pitch settings.
- CE certified.

**Technical specifications**

The multi magazine buffer can be used as a mid-line loader or unloader, as a high capacity LIFO/FIFO buffer or as a reject buffer.

**Standard features**
- Automatic magazine change-over
- 5 operation modes available:
  - Buffer mode (LIFO/FIFO)
  - Unload mode
  - Load mode
  - Reject mode
  - By-pass mode
- Dual function pusher conveyor.
- Pressure limitation on pneumatic pusher.
- Threshold signal to protect PCB’s in upstream oven.
- Controlled by PLC.
- Towerlight display for machine status.
- Selectable pitch settings.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Conveyor concept: ESD belt
- Belt speed: 14 m/min.
- PCB edge support: 3 mm
- Components clearance: Top 30 mm, bottom 30 mm (depends on pitch)
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 800 VA max.
- Air supply: 4-6 bar
- Air consumption: 15 ltr/min max.
- Machine cycle time: 12-30 seconds max.
- Pitch control: 1.4, 10 mm pitch
- Maximum total magazine weight: 50 kg each
- Total number of magazines:
  - 1 magazine on the lifter platform.
  - 2 empty magazines on the upper magazine conveyor.
  - 2 full magazines on the lower magazine conveyor.
- * or specify

**Options**
- By-pass conveyor above magazine platform
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Width adjustable magazine conveyor(s)
- Magazine conveyors located at front-side.
- Touchscreen display
- Alarm buzzer

The FIFO buffer is designed to buffer PCB’s in FIFO mode. The PCB’s are transferred by special ESD rollers onto the pick-up location. Metal support bars lift the PCB carefully from the conveyor segment and stores them until downstream request.

**Standard features**
- Selectable FIFO, LIFO and by-pass mode.
- Controlled by PLC.
- Conveyor width adjustment using hand crank.
- Selectable pitch settings.
- Threshold signal to protect PCB’s in upstream oven.
- Towerlight display for machine status.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*
- Conveyor concept: ESD roller
- Conveyor speed: 8 m/min.
- PCB edge support: 3 mm
- Components clearance: Top 30 mm, bottom 30 mm (depends on pitch)
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 350 VA max.
- Air supply: 4-6 bar
- Air consumption: 2 ltr/min max.
- Machine cycle time: 12-30 seconds max.
- Pitch control: 1-4, 20 mm pitch (component height -5 mm from selected pitch)
- Buffer capacity: Max. 26 pcb’s at pitch 1 * or specify

**Options**
- High speed operation reducing cycle time to 20 sec.
- Cantilevered input- or output conveyor (length 500 mm)
- Adjustable threshold counter
- Cool down timer or package
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Reject mode for buffering bad boards
- Touchscreen display
- Alarm buzzer

The LIFO buffer is designed to buffer PCB’s in LIFO mode. The PCB’s are buffered using four special chains. The open design allows operator to manually remove the PCB’s when used as good/bad separator or line unloader.

### Standard features
- Buffer in LIFO mode.
- Controlled by PLC.
- Conveyor width adjustment using hand crank.
- Selectable pitch settings.
- Threshold signal to protect PCB’s in upstream oven.
- Towerlight display for machine status.
- Good or bad board separation.
- CE certified.

### Technical specifications
- **Transfer height:** 950 mm ± 25 mm*
- **Colour:** RAL 9002*
- **Flow direction:** Left to right*
- **Fixed rail:** Front *
- **Machine interface:** SMEMA*
- **Conveyor concept:** ESD belt
- **Belt speed:** 14 m/min.
- **PCB edge support:** 3 mm
- **Components clearance:** Top 30 mm, bottom 30 mm
  (depends on pitch)
- **Power supply:** 230 VAC/50 Hz/1 Ph
- **Power consumption:** 250 VA max.
- **Machine cycle time:** ± 15 seconds
- **Pitch control:** 1-4, 9.5 mm pitch
  (component height -3 mm from selected pitch)
- **Buffer capacity:** Max. 49 pcb’s at pitch 1 * or specify

### Options
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Cantilevered input- or output conveyor (length 500 mm)
- Adjustable threshold counter
- Touchscreen display
- Alarm buzzer

Other options available on request
This unit allows buffering of PCB’s in FIFO mode. It uses belt segments to hold the PCB over its complete length. When adding or extracting a PCB to/from the buffer a drive mechanism engages with the belt segment to smoothly transfer the PCB in- or out.

**Standard features**
- Selectable FIFO and LIFO mode.
- Controlled by PLC.
- Conveyor width adjustment using hand crank.
- Selectable pitch settings.
- Threshold signal to protect PCB’s in upstream oven.
- Towerlight display for machine status.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*

- PCB edge support: 3 mm
- Components clearance: Top 30 mm, bottom 30 mm (depends on pitch)
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 600 VA max.
- Air supply: 4-6 bar
- Air consumption: 2 ltr/min max.
- Machine cycle time: 8-30 with average of ~ 15 seconds.
- Pitch control: 1-4, 27 mm pitch
- Buffer capacity: Max. 20 pcb’s at pitch 1
  * or specify

**Options**
- Servo drive upgrade for shortened cycle time
- Cantilevered input- or output conveyor (length 500 mm)
- Adjustable threshold counter
- Cool down timer or package
- Electrical conveyor width adjustment
- Automatic conveyor width adjustment
- Reject mode for buffering bad boards
- Touchscreen display
- Alarm buzzer

E-series Single magazine line loader

NTE 0710LL

The unit loads your production line automatically by pushing PCB’s out of a magazine onto the conveyor of the down-stream machine.

**Standard features**
- The magazine is manually placed on the platform and clamped in position.
- Flexible platform to suit standard magazines.
- Controlled by PLC.
- Exchange magazine from the rear of the machine.
- Regulated pressure on attached pneumatic pusher.
- Pusher position adjustable to center of the magazine.
- Towerlight display for machine status.
- Selectable pitch settings.
- CE certified.

**Technical specifications**

- **Transfer height:** 950 mm ± 25 mm
- **Colour:** RAL 9002

This unit is used to link between production machines or board handling units.

**Standard features**
- Conveyor width adjustment using hand crank.
- Inspect function at exit sensor.
- Controlled by PLC.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm
- Colour: RAL 9002
- Flow direction: Left to Right
- Fixed rail: Front
- Machine interface: SMEMA
- Conveyor concept: ESD belt
- Belt speed: 14 m/min.
- PCB edge support: 3 mm
- Component clearance: Top 30 mm, bottom 30 mm
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 100 VA max.

**Options**
- Belt segment divided into 2 x 500 mm

E-series Inspection conveyor 1000mm

The inspection conveyor is used when frequent visual inspection of PCB’s is required in the PCB assembly line.

**Standard features**
- Conveyor width adjustment using hand crank.
- Inspect and by pass mode selectable.
- Controlled by PLC.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm
- Colour: RAL 9002
- Flow direction: Left to Right
- Fixed rail: Front
- Machine interface: SMEMA
- Conveyor concept: ESD belt
- Belt speed: Fixed in 14 m/min. variable out 2-14 m/min.
- PCB edge support: 3 mm
- Component clearance: Top 30 mm, bottom 30 mm
- Power supply: 230 VAC/50 Hz/1 Ph
- Power consumption: 100 VA max.

**Options**

**E-series Workstation 1000 mm**

The workstation is used where manual assembly work is performed on the PCB without removing it from the PCB assembly line.

**Standard features**
- Conveyor width adjusting using hand crank.
- Work and by-pass mode selectable.
- Controlled by PLC.
- ESD bracelet connection.
- Centre PCB stop position.
- Sliding parts shelf.
- Overhead lighting.
- CE certified.

This unit is used to invert/flip PCB’s (180°) for ‘double-sided’ process.

**Standard features**
- Rotation using pneumatic cylinder.
- Conveyor width adjustment using hand crank.
- Pneumatic stopper to keep PCB in position during inverting.
- Controlled by PLC.
- By-pass mode selectable.
- CE certified.

**Technical specifications**

The unit is designed to change the flow direction of a PCB assembly line. The PCB is transferred onto the built-in ESD belt conveyor, which turns either clockwise or counter-clockwise.

**Standard features**
- Conveyor width adjustment using hand crank.
- (NTE 091) Turning 90° clockwise or counter-clockwise
- (NTE 0181) Turning 180° to change fixed rail position
- (NTE 0271 and 0361) various configurations possible.
- By-pass mode available.
- Controlled by PLC.
- Unique lateral transfer system to handle small PCB’s.
- CE certified.

**Technical specifications**
- Transfer height: 950 mm ± 25 mm*
- Colour: RAL 9002*
- Flow direction: Left to right*
- Fixed rail: Front*
- Machine interface: SMEMA*

Advance platform line loader/unloader

NTM 4410LM • NTM 4410UM

Used to either load or unload substrates, leadframes and carriers. System uses a pneumatic pusher and integrated conveyor for loading or unloading of the line.

Standard features

- Caters for different magazine types/dimensions.
- Magazine capacity depends on external magazine dimensions.
- Touch screen operation panel for swift adjustment of magazine change over/settings.
- Stores up to 10 different types of magazine dimensions.
- Servo motor drive for flexible positioning and precise indexing.
- Controlled by PLC.
- Tailor made to the magazine of your choice.
- Regulated pressure on pneumatic pusher.
- Conveyor width adjustment using hand crank.
- Towerlight display for machine status.
- CE certified.

Technical specifications

Transfer height: 950 mm ± 25 mm*
Colour: RAL 9002*
Flow direction: Left to right*
Fixed rail: Front*
Machine interface: SMEMA*
Indexing pitch: 6 mm*
Conveyor concept: ESD belt
Belt speed: 14 m/min.
PCB edge support: 3 mm
Power supply: 230 VAC/50 Hz/1 Ph
Power consumption: 850 VA max.
Air supply: 4-6 bar
Air consumption: 1 ltr/min max.

</table>
The high speed mini loader is used to load substrates, lead-frames, carriers onto the line. The full magazine is automatically picked up from the lower magazine conveyor. When in position a pneumatic pusher is used to push the product out of the magazine starting at the bottom magazine slot. When the magazine is empty it is placed on the upper magazine conveyor. The standard features include:

- Operation by touch screen panel.
- Stores up to 10 different type of magazines.
- Swift change-over between different magazine types.
- Multi magazine capacity, quantity depends on external magazine dimensions.
- Stainless steel magazine guide.
- Servo controlled lifter motor.
- High speed and precise indexing according to the selected magazine.
- Regulated pressure on pneumatic pusher.
- Controlled by PLC.
- Towerlight display for machine status.
- CE certified.

### Technical specifications

- **Transfer height:** 950 mm ± 25 mm*
- **Colour:** RAL 9002*
- **Flow direction:** Left to right*
- **Fixed rail:** Front*
- **Machine interface:** SMEMA*
- **Power supply:** 230 VAC/50 Hz/1 Ph
- **Power consumption:** 850 VA max.
- **Air supply:** 4-6 bar
- **Air consumption:** 10 ltr/min max.
- **Product loading time:** ± 5 seconds
- **Magazine change-over time:** ± 20 seconds
- **Indexing pitch:** 1-4 (5 mm pitch)*
- **No. of magazines:** Depends on magazine type

### Options

- Alarm buzzer
- Other options available on request

### NTM 4412LM

- **Machine dimensions (l x w x h):** 820 x 1200 x 1390 mm
- **Weight:** 210 kg
- **Magazine length:** 165 mm - 305 mm
- **Magazine width:** 25 mm - 127 mm
- **Magazine height:** < 330 mm
- **Fixed rail to front dimension (A):** 630 mm
**High speed mini unloader**

**NTM 4412UM**

The high speed mini unloader is used to unload substrates, leadframes, carriers from the line. The empty magazine is automatically picked up from the upper magazine conveyor. Via the mini conveyor the product is transferred into the magazine, starting at the top magazine slot. A pneumatic pusher extends to push the product completely inside the magazine before magazine indexes to the next position. When the magazine is full it is transferred on to the lower magazine conveyor.

### Standard features
- Operation by touch screen panel.
- Stores up to 10 different type of magazines.
- Swift change-over between different magazine types.
- Multi magazine capacity, quantity depends on external magazine dimensions.
- Stainless steel magazine guide.
- Servo controlled lifter motor.
- High speed and precise indexing according to the selected magazine.
- Regulated pressure on pneumatic pusher.
- Hand crank width adjustment belt conveyor
- Controlled by PLC.
- Towerlight display for machine status.
- CE certified.

### Technical specifications
